WPMS bvba part of the new Ford Galaxy project in Ford Genk

From beginning March to beginning September 2005, WPMS bvba was involved in the development of the production lines of the side panels for the new Ford Galaxy model in Ford Genk. For this project, WPMS undertook the coordination of the hardware engineering and provided assistance in the project coordination by commission of VMA Industrie NV in Sint-Martens-Latem (<http://www.vma.be>).

In collaboration with WWA BV – World Wide Automation, VMA NV took charge of the electro-technical installation and automation operations (PLC and robot programming) to service these new production lines by commission of the German manufacturer Emil Bucher GmbH & Co. (<http://www.emilbucher.de>).

The total installation included 18 Allen-Bradley PLCs - type PLC5/80C, 10 Pilz safety PLCs PSS3000, and 64 robots of the type KUKA KRC1 and ABB IRB6400 S4. WPMS bvba wishes to thank all parties involved for their excellent cooperation in the realization of this project.

Cooperative partnership between WPMS bvba and ELW bvba

Article taken out of this publication, because of the discontinuation of the above mentioned collaboration between WPMS bvba and ELW bvba.
